Yeah it is. I think you did good because your blue is closer to the traditional Shelby blue than the Lightning appears to be. Looking forward to getting one in to see what it looks like.

I agree. Completely happy with DIB. There is something about Lightning blue that is appealing, though.

So R changes are 9-speaker audio (up from seven) if you opt for the electronics package and soft door rollover standard along with all GT350's. What the heck is soft door rollover, anyway?

I've looked it over a few times, and the main driver for getting an option package is the toggle switches. I don't see it listed as standard, or in any of the options. Anyone have an idea about that?
