

Mustang 550/GT350 Rear Tow Hook Receiver Installation

1. Remove rear fascia or rear extractor.
2. Find center of rear crash bar and center the receiver. Then, match drill 2 5/16 holes in bottom of crash bar and up through the bottom section, as shown in drawing.
3. Install receiver with coupling nut, facing to the rear of car and tighten the 2 lock nuts with the 2 washers.
4. Remove license plate and measure up from bottom of fascia to bottom edge of receiver and make note of it.
5. Measure up on the outside of the fascia the same distance as noted and add 6 inches and make a mark on fascia.
6. Use a 1/8 drill and drill through the fascia center and the distance up from bottom of fascia.
7. Use a wire or small driver to make sure you are centered to the coupling nut of the receiver, if so drill a 3/4 hole through the fascia. When tow hook is not used the license plate will cover hole.
8. Re-install the lower extractor.
