

6th Generation Mustang Rear Floor Mat Template

Instructions:

1. Print all 4 pages on A4. Do not allow your software or printer to add margins or 'fit to page'.
2. Align pages using the crosses and template outline. Stick together with glue and/or tape.
3. Check the maximum width of the template is 465mm and the height is 348mm. $\pm 5\text{mm}$ either way should be fine, but you may need to adjust your cutting.
4. Cut out the template and check it fits the floor of the rear left side of your Mustang.
5. Simply flip the template over to get the right side. The right side pattern is a mirror of the left.
