NUD105-R025E Ford Flex Probe Kit

Avoid damaging the vehicle's electrical connections!! Using the proper size probe tip to access the working end of an electrical connection will reduce the risk of damaging the vehicle terminal and will eliminate the need to back probe or pierce wires (opening up the risk of future corrosion). The latest in the line of Ford Flex Probe Kits, this newest release includes all the probes from the previous "D" kit, but now adds two each of the Micro Pin (.5mm) Probe. Additionally, all probes will now be printed with the tip size, helping technicians ensure usage of the properly sized tip.

NUD105-R025E Kit contains:

- (2) stackable banana jack patch cords (4 feet long), one red & one black
- (2) each: 0.060 inch male & female probes - gray boots
- (2) each: 0.110 inch male & female probes - green boots
- (2) each: 0.120 X 0.027 inch male & female probes - yellow boots

Terminal Release Tools

Rotunda and Electrical Engineering worked together to design 3 new terminal release tools to allow technicians to easily remove terminals from Ford connectors.

These tools coincide with the release by Ford of 9 terminal repair kits to allow you to repair connectors with damaged terminals instead of replacing an entire wire harness. Improved wiring repair capability was a key request of technicians, FSEs and the TRP (Technician Repair Panel). With the release of these tools, the terminal repair kits and terminal part number identification in the Wiring manuals (starting with new models in 2013), you now have the ability to repair most wiring connector issues, especially in high cavity count connectors.

Terminal Release Tools RTTP #'s: NUD900-001, NUD900-002, NUD900-003 and NUD105-R025E Flex Probe Kit are available through RTTP.

MOTORCRAFT® WIRE SPLICE/SHRINK TUBING PACKAGES

- The new Motorcraft® wire splice/heat shrink packages are to be purchased as replenishment parts for the new ROTUNDA Wire Splice Tool Kit. They contain 5 uninsulated butt splices, 5 pieces of dual wall adhesive-lined heat shrinkable tubing, and the new instruction sheet detailing the approved wire splice procedure as defined by Ford Motor Company.
- The package will construct five complete splice repairs and is available in four wire ranges:

WT-56815

WT-56816

WT-56869

Wire Range

Expanded wire gauge applications for these splices can be found in Technical Service Bulletin Number 03-11-6.

- Ford Engineering has determined that the combination of the crimped uninsulated butt splice, insulated with a 2" piece of adhesive-lined heat shrink tubing, has proven superior in terms of strength, durability and corrosion resistance. When heated, the tubing shrinks and the adhesive lining melts and flows to form a rugged, environmentally sealed barrier against corrosion, and eliminates the potential deterioration of the vehicle's electrical wiring harness.
- As separate components, these butt connectors and heat shrinkable tubings are known for their superior quality and performance. Combined, you cannot achieve better results, and this is precisely why Ford Motor Company has chosen this combination for repairing wiring harnesses.

Ford Motor Company now has Wire Terminal Repair kits available to allow replacement of damaged or corroded terminals in a connector. This can save a customer hundreds of dollars for a complete wire harness and the labor to install it.

There are 10 female terminal kits, 6 male terminal kits and 5 Power Distribution Box (PDB) terminal kits that will service 65% of the terminals used on Ford vehicles today. This is accomplished by having one terminal in a kit that can substitute for up to 10 other terminals in the vehicle.

To help identify which kit you need, Ford has started updating the Online Wiring Manual on the Ford PTS (Professional Technician Society) website with terminal information. Not all manuals will have this information. Here's how it works:

- When you are looking at a wiring diagram on a 2013 or newer vehicle, click on a connector number (C Number). It will take you to the Connector Face View page where there is a box that says "Check for Terminal Part Numbers."
- Click on it and it will display the Ford Engineering Part number of each terminal in the connector. There also will be a chart that shows the terminal part number and the Service Part Number of the Wire Terminal Repair Kit that will service that terminal.
